

The Green Climate Fund at a Glance

- Created by the UNFCCC to fund and promote development climate action.
- \$10.3 billion in total pledges
- 24 member Board, equally representing developed and developing countries
- Paradigm Shift

Allocation Framework

Total Fund Portfolio

Adaptation Portfolio

- Geographic balance
- Significant allocation to Private Sector Facility
- Sufficient resources for readiness activities

Strategic Impact Areas

Mitigation:

- Low-emission energy access and power generation
- Low-emission modes of transport
- Buildings, cities, industries and appliances
- Land use, deforestation, forest degradation, and through sustainable management of forests and conservation and enhancement of forest carbon stocks

Adaptation:

- Livelihoods of people, communities and regions
- Health and well-being of people, food and water security
- Infrastructure and buildings
- Ecosystems and ecosystems services

Investment Framework

Impact Potential

- Potential to achieve the Fund's objectives and result areas

Paradigm Shift Potential

- Potential to catalyse impact beyond a one-off project or programme investment

Sustainable Development Potential

- Potential to provide wider benefits and priorities

Needs of Recipient

- Vulnerability and financing needs of the beneficiary country

Country Ownership

- Beneficiary country ownership of and capacity to implement funded activities

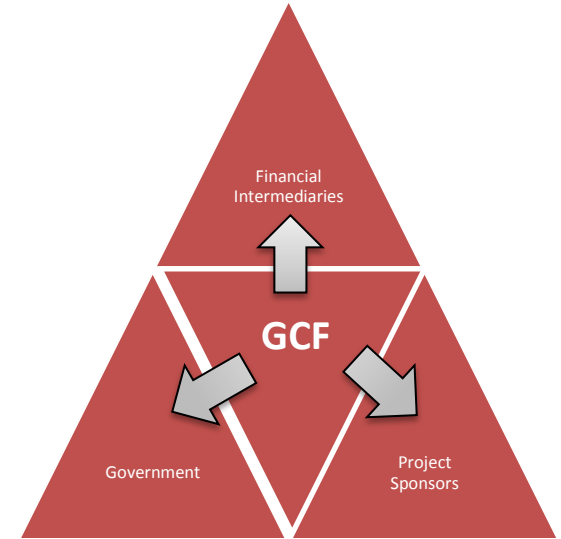

Efficiency & Effectiveness

- Economic and, if appropriate, financial soundness of the programme/project

The Private Sector Facility

- The GCF's Private Sector Facility (PSF) was created to catalyze and maximize private sector engagement in climate finance throughout developing countries.
- The GCF will allocate a significant proportion of its resources to the PSF.
- **The PSF is not an “add on” within the GCF; it is mainstream component of the GCF, just as the private sector needs to be a mainstream component of climate-sensitive investing throughout developing countries.**

USD 87 TRILLION GLOBAL GDP

- Private sector makes up 2/3 of global economy.
- Private sector is critical to ensure the mainstreaming of climate-sensitive investing, and achieve the desired global paradigm shift.

Private Sector Facility

Instruments:

- Grants
- Concessional Loans
- Equity Investments
- Guarantees

Addressing Key Challenges:

- Political risk
- Longer tenors
- Large projects
